Just an FYI – I expect our revised report and the statewide mapping application to be posted on our website by tomorrow afternoon. I will send it to you as soon as its complete.

For some reason, the maps in the current report printed showing many State-only (i.e. non-jurisdictional to 404) wetlands as State-assumable wetlands. As such, they overestimate the amount of State assumable wetlands. The data in the report is correct, its just the maps that printed wrong. That will be corrected tomorrow...
